SBWC-01 Body worn Camera is a wearable audio, video, or photographic recording system. It has the ability to stream in real time from the camera through a WIFI/ 4G-LTE network. High quality video can now be seen live anywhere in the world allowing real-time situational awareness and decision making. This ability has the potential to completely transform certain incident handling and outcomes, giving our users a totally new tool to enhance their effectiveness. SBWC-15 has a range of uses and designs, of which the best-known use is as a part of law enforcement to record their interactions with the public, or gather video evidence at crime scenes. Other uses include action cameras for social and recreational, commercial, healthcare, military, journalism and citizen surveillance.

Key Function

Latest Waterproof Technology

Waterproof designing, whole day recording , can work in complex environment.

Industrial Grade Material

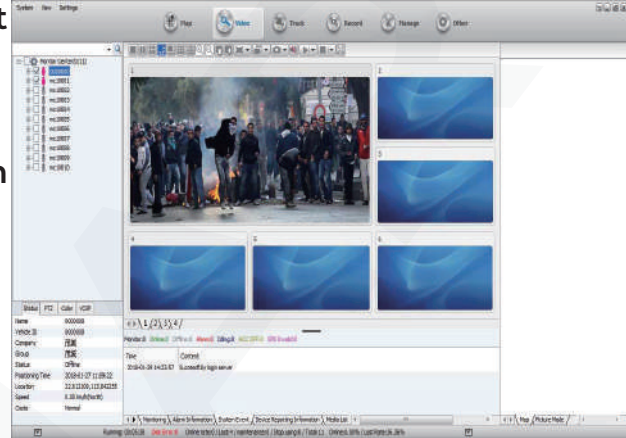

The camera case is made from scientific structural design and industrial grade plastics ensuring 2 meters drop-resistance and won't damage camera body and data.

LIVE STREAM CAMERA MANAGEMENT SYSTEM

Sanchar CMSV6 is a video management system, which is an integral component of a security camera system that in general:

- Collects video from cameras and other sources
- Records / stores that video to a storage device
- Provides a password controlled interface to both view the live video, and access recorded video

Live Stream System Diagrammatization

Low Latency Data Transmission

The low delay data transmission which less than 0.6 second ensures the high efficiency and real-time performance of data return.
